

Night Flying Information

Night-flying discussion and pics - > <http://www.rcgroups.com/night-flying-522/>

Switch to remotely operate aircraft lights => <http://www.superdroidrobots.com/shop/item.asp?itemid=828>

Note: All glowwire should be powered from either a 9V alkaline battery or an 11.1 volt 3s lipo pack. The amps draw is very low, but they need the volts to glow properly!

How to solder/splice el-wire/glowwire => <http://www.vibelights.com/lehowtosoelw.html>

El-wire supplier (also called glowwire) => <http://www.glowwire.com/>

El-wire supplier (also called glowwire) => <http://www.coolight.com/>

El-wire supplier (also called glowwire) => <http://www.glowhut.com/>

Glowwire, XeroGear (led self-adhering strips of lights), and other neat night-fly stuff => http://www.helidirect.com/helicopters-night-flying-c-1_402.hdx

Kadet Sr. internally lighted by LED's (how to article) => <http://www.eastrc.org/chris/info/viewtopic.php?f=2&t=9>

Ebay Keyword searches: (El wire, glowwire, El Panel) <- include the parens!

If you go to Ebay Toys & Hobbies category, Radio Control & Control Line, Radio Control Parts & Access. then search for "LED LIGHT" you get about 350 or so search results... some are applicable to airplanes, you just have to look thru the results.
